

4200 SERIES

SUPER HYDROPHOBIC AND OLEOPHOBIC
NANOTECHNOLOGICAL COATING

ANTI-FINGERPRINTS

TECHNICAL DATA

- Contact Angle.....110° - 120°
- Durability.....2-3 years
- Coverage.....20-60ml/m2

Nanoshield[®]
SUPER HYDROPHOBIC TECHNOLOGY

The **4200 series** when applied on touch screen glass protects at the nano metric level of between 20-30 nanometers; creating a water and dirt repellent layer with super hydrophobic and oleophobic effect.

Features

Repellent to moisture, liquids and body fluids

Excellent anti-UV and mud resistant protection

Excellent super hydrophobic property

Excellent super oleophobic property

No effect on transparent screens

Waterproof, dustproof, self-cleaning, anti-reflective, anti-snow (easy to remove snow)

Excellent wear resistance and long life.

Applications

- All types of Touch Screen, for indoor and outdoor
